Sr. Corporate Accountant | ASC 842 Lease Expert | Technical Accounting Specialist | CPA Candidate

PROFESSIONAL SUMMARY

Results-driven Senior Accountant with 12+ years of progressive accounting experience in high-growth technology companies, including 5+ years in public company environments. Expert in technical accounting (ASC 842, ASC 606), month-end/quarter-end close processes, and financial reporting. Recognized with award for outstanding performance during Splunk's acquisition by Cisco. Proven track record of improving efficiency by 75% through process automation, leading system migrations (NetSuite to SAP), and managing complex M&A integrations. CPA Candidate with 2 sections passed.

CORE COMPETENCIES

Technical Accounting: US GAAP | ASC 842 (Leases) | ASC 606 (Revenue) | Policy Documentation

Financial Close: Month-End/Quarter-End Close | Flux Analysis | Account Reconciliations | Variance Analysis

Systems: SAP | NetSuite | Oracle | QuickBooks | Salesforce | System Migration | Adaptive Planning | Bill.com | Recurly

Specialized Areas: Lease Accounting | Cloud Infrastructure | Revenue Recognition | PO Accruals | M&A Integration | Process automation

Compliance: SOX Compliance | Internal Controls | External Audit Coordination | System Implementations

PROFESSIONAL EXPERIENCES

Sr. Accountant

Splunk (acquired by Cisco)

Sept 2020-Oct 2025

San Jose, CA

**** AWARD:** Recognized for Outstanding Performance during critical acquisition period **

Primary Preparer - Month-End & Quarter-End Close Leadership

- Served as primary preparer for the month-end and quarter-end close calendar, checklist, and reconciliations across multiple complex accounting areas
- Led transformation from calendar month to 4-4-5 calendar structure, ensuring adherence to strict public company reporting deadlines
- Shortened the rent close timeline from 5 days to 3 days by implementing a mid-month prepaid rent review process
- Prepared comprehensive account reconciliations with strong internal controls and maintained detailed SOX compliance documentation
- Managed a large portion of complex accruals, PO clean-up efforts, and ensured the accuracy of financial statements

Flux Analysis & Financial Reporting

- Prepared materials for monthly and quarterly flux presentations, validating P&L, and providing deep insights connecting financial results to business drivers
- Performed comprehensive variance analysis across multiple GL accounts, analyzing trends and investigating unusual fluctuations
- Created trending reports for management decision-making, translating complex financial data into actionable business insights

- Reviewed and analyzed accruals for accuracy, methodology, relevance, and completeness

Technical Accounting - ASC 842 Lease Accounting Expertise

- Owned worldwide lease accounting function for 55+ lease contracts across all global locations, applying ASC 842 standards
- Supervised a team of 5 accountants responsible for lease accounting and accrual processes
- Achieved 75% reduction in manual effort by developing new strategies, including a mid-month review process
- Handled complex lease scenarios, including lease modifications, embedded leases, capitalization decisions, and impairment analysis
- Prepared technical accounting memos documenting contract analysis and accounting treatment conclusions
- Calculated ROU assets and lease liabilities, prepared journal entries, and ensured proper classification under ASC 842
- Partnered with the Technical Accounting team on complex lease scenarios and maintained a comprehensive lease database
- Collaborated with Legal, Real Estate, FP&A, and Tax teams to evaluate new lease agreements
- Ensured SOX compliance for lease-related controls and maintained robust audit documentation

Complex Expense Accounting & Business Partnership

- Owned accounting for AWS, Azure, and GCP cloud services, representing over 10% of total company expenses
- Managed highly complex data center accruals involving multi-layered vendor agreements and intricate allocation methodologies
- Coordinate with Engineering and IT teams to validate consumption metrics and ensure accurate cost allocation
- Served as subject matter expert for PO accrual process for CSX, P&T, and Sales groups
- Demonstrated deep understanding of complex vendor contracts and their accounting treatment

M&A Integration & System Implementation

- Played a critical role during Cisco's acquisition of Splunk, aligning accounting processes for Rent, Data Center, and Accrual areas
- Led NetSuite to SAP system migration through multiple phases, including system design, mapping, UAT testing, and cost-plus accounting integration
- Collaborated with integration teams, IT, Engineering, Finance, and business partners to ensure seamless system transition
- Documented and communicated complex historical transactions, identifying process gaps and standardizing practices
- Managed reconciliations at the entity and consolidated levels during transition
- Built proper accounting procedures and internal controls to ensure compliance with accounting policies

External Audit Coordination & Compliance

- Collaborate with external auditors, serving as the primary point of contact and providing timely, comprehensive information
- Prepared audit schedules, responded to PBC requests, and ensured on-time completion of audit timelines
- Maintain organized workpapers, document accounting conclusions, and proactively anticipate auditor questions
- Partner with the Tax team to ensure proper book-to-tax reconciliation
- Maintain comprehensive documentation, ensuring compliance with US GAAP and regulatory requirements

Process Automation & Continuous Improvement

- Leveraged technology to automate accounting processes

- Took the initiative to apply knowledge of processes and recommend improvements
- Developed improved reconciliation methodologies based on new system requirements
- Created training materials and provided comprehensive training to team members

Sr. Accountant
Heartflow

May 2019 - Aug 2020
Redwood City, CA

Fast-Paced Startup Environment - Revenue Accounting & ASC 606

- Led end-to-end revenue accounting operations in a fast-paced startup environment, including ASC 606 compliance
- Managed the complete month-end close process with minimal supervision
- Analyzed complex customer contracts and prepared technical accounting memos
- Handled ambiguity and changing priorities while documenting comprehensive policies and procedures
- Maintained detailed reconciliations for deferred revenue, contract assets, liabilities, and RPO

Process Improvement & Cross-Functional Collaboration

- Designed a customer tracking system that streamlined revenue processes and eliminated task duplication
- Implemented a collection strategy that improved AR aging by 25%
- Automated weekly check-run processes and enhanced cash management
- Prepared monthly revenue reports and variance analysis for management teams
- Collaborated with Legal, Sales, and Finance teams

Sr. Accountant (Consultant)
Multiple Startup Clients

Dec 2018 - May 2019
Bay Area, CA

- Provided full-cycle accounting for 3-4 startup clients simultaneously
- Led month-end close processes with minimal supervision
- Demonstrated ability to quickly learn new systems, handle ambiguity, and deliver quality work under tight deadlines
